

FARMER'S LUNG

Supplemental Activity 3

Personal Protective Equipment (PPE)

Safety equipment demonstrators or salespersons may be asked to visit the class and discuss PPE and its use in agricultural occupations. Pinpoint certain topics for the speaker to stress within their discussion, such as the cost of protective equipment vs. the medical expense of living with a lung disease, or the “uncomfortable feeling/fit” of safety equipment vs. the discomfort and illness of a lifelong disease such as Farmer's Lung. Have them bring cost estimates for the equipment and samples to visualize or try on for the students.
